

Intergrate Torque sensor Motor

Features

- new patented product;
- assembly for electric bicycle motor internal;
- measurement accuracy;
- simple installation;
- stable performance;
- dustproof and waterproof features

Technology parameters:

Torque sensor			
Torque range	0-20Nm	Input	5-12(VDC)
Output	1.2- 3.2 VDC	SpeedOut	12 impulses/rotation
Torque sensor		Connection defined	
Red	Power	Green	Torque sensor Sigle
Black	GND	White	SpeedOut Sigle
Motor			
Rated Voltage	24/36/48VDC	Drive and freewheeltype	5s-7s
Rated Power	180-350 W	Spoke specification	Shaft center right
speed	180-370 rpm	Hall sensor	Optional
Rated efficiency	≥80%	Weight	3.5 Kg
Open size	135	Break type	Disk/V break
